

The entanglement of individual forces into a potential field and a common vision

Vibrant organization with NVC-plus

NVC-plus transforms the dominant or functional togetherness into an organic circular structure. Experience this in your business and power team.

Strategy of things

The power of calculation, functionality and technology has reached its limits.

Strategy in cooperation

The power of networked individuality brings new life to the organization.

Classic NVC and NVC-plus

Classic non-violent communication (NVC) according to Dr. Marshall Rosenberg has made clear the value of emotions for good cooperation. NVC-plus organizes systems and transforms emotions into inspiring visions. Experience this privately and in your Buissinesss Power Team.

NVC - Peace of persons

Without sufficient peace, there is no synergy and no good cooperation.

NVC-plus - Peace in the system

Synergy needs a simple model that activates and networks the individual potential in the team. Otherwise, the strength and constructiveness will disappear and peace will quickly return.
